## President's Message

To those who didn't make it to the March Meeting, you missed a beautiful day and very good and friendly restaurant. It was small, but we still had seats left if you had shown up.

I was late for the meeting because my car quit on the way. Luckily Helen drove separately and was able to pick me up and get me to the meeting. The last time she rode in my Studebaker to a meeting, the fuel pump failed and we came home in a roll-back. Those who were wondering if I got my car home, yes I had run out of gas. I got some more gas on our way to get the car and that, along with some 12v cranking with a jumper, got it going. I drove it home without a problem. I stopped and got some more gas on the way home and it started after getting the gas. The next time I tried to start it, after it had set for a week, it would not start because the battery was still low. I put the charger on it and it should be fully charged now.

I'm sure you all have been wondering how my transmission leak repair turned out. Well I'm happy to report that after about 50 miles on it, oil still came out of the fill hole when I pulled the plug out. It would have never have done that before the fix. In fact it would have been about a half quart low after that many miles before the repair. It still has a slow leak, because there is still a drip hanging on the bottom of the transmission, but it is a leak I can live with. This is a "check it once a year" leak not an "every trip" check.

-Loren Nelson-

### SOME THOUGHTS ON RESTORING A STUDEBAKER

Written by Chuck Lampman, this 99-page book is based on articles written by Chuck Lampman, North Georgia Chapter SDC member, that appeared in *Turning Wheels* in the early 1990's and won the SDC Churchill Award for Best Article, Non-paid. Some material edited out of *Turning Wheels* is included

in the book as well as updates and several new items written after the *Turning Wheels* series was published. "Some Thoughts" is aimed at the first time restorer but will be of value to the more experienced. It is not intended to be a "how to restore" book but gives a look at the decision-making processes, tools, spaces, and basic skills needed to do a restoration. It also provides a framework to help structure a project and contains several chapters of Studebaker-specific advice.

Cost for the book shipped to continental US addresses is \$22.50 plus \$4.00 for handling and postage. Payment can be made through PayPal sent to [chuck@lampman.com](mailto:chuck@lampman.com) or by mailing a check or money order to Chuck Lampman, 4141 Lynette Court, Kennesaw GA 30144-2293.

NOS Studebaker Water Temperature Sending Unit Switch 1956 - 1963 1539876 USA Brass.

I ordered this when it showed up under my 37 Studebaker eBay search, without remembering that my car does not have an electric temperature sender and I guess I didn't read the post. It has a closed system with a tube connecting the sender to the guage. Getting old is tough. I paid \$35.99 and will sell for \$30 so I don't have to send it back.
